Description

Traffic Cone 50 cm PVC – Without Stripes

Our **50 cm PVC Traffic Cone – without reflective stripes** is a high-quality, durable and cost-effective solution for marking hazardous areas, temporary zones or spaces excluded from use. Made from **flexible PVC**, the cone maintains excellent visibility thanks to its bright **orange color**, even without white stripes. This product is particularly valued in the **construction industry**, **road infrastructure**, **sports facilities**, **warehouses**, and **parking areas**.

Purpose and Regulations

The 50 cm cone is ideal for compliance with safety requirements related to temporary marking of workplaces, storage zones and traffic organization, supporting guidelines commonly used across the EU for local site protection and temporary road management. Although it does not contain reflective stripes, it remains a highly practical option where long-distance visibility is not the primary requirement.

Product Advantages

Our PVC cone is resistant to impacts, cracks and deformation thanks to its flexible structure. It is lightweight (1.2 kg), stable and easy to store. Its outstanding **price-to-quality ratio** makes it an attractive choice for companies seeking efficient and economical safety signage.

Five Additional Uses

1. Marking temporary pedestrian paths
2. Securing sport events and training zones
3. Identifying technical service areas
4. Separating parking or loading spaces
5. Creating teaching zones in driving schools

Why Choose Our Company?

We have been a respected manufacturer and importer of **road safety equipment** for many years. Our brand is well-known across European markets, serving both wholesale and retail customers. Thanks to our large warehouse, **most products ship directly from stock**, ensuring fast delivery. Our assortment includes hundreds of road safety items, making us specialists in the industry.

Pachołek 50 cm PVC - bez pasów

Pachołek drogowy 50 PVC niemalowany jest alternatywą dla klasycznych pachołków ostrzegawczych. Gumowy pachołek nie posiada białych pasów lecz dzięki kontrastującej, pomarańczowej kolorystyce, utrzymuje wysoką widoczność. Pachołek ostrzegawczy wykonany jest z elastycznego PCV, dzięki któremu nie ulega łatwo pęknięciom. pachołek ten jest wyjątkowo przydatny w branży budowlanej, sportowej oraz drogowej. Z powodu niskiej ceny, stanowi okazyjny zamiennik, gdy widoczność z daleka nie jest priorytetem. Pachołek wykorzystywany jest do zabezpieczeń miejsc wyłączonych z użytku lub niebezpiecznych, może być także przydatny na placach budowy, parkingach czy halach magazynowych.

Cechy:

- Pachołek drogowy o wysokości 50 cm.
- Wykonany z elastycznego PCV.
- Kolor - pomarańczowy.
- Waga 1,2 kg.
