# Professional Road Safety Equipment for Construction, Parking & Traffic Control

Our **50 cm blue PVC/REC Traffic Cone** with reflective PVC stripes is a premium-quality safety device designed to ensure maximum visibility and reliable performance in all traffic-management conditions. Manufactured from **flexible PVC** combined with a **soft recycled rubber base**, this cone offers exceptional stability, long service life and excellent resistance to mechanical impact, temperature fluctuations and intensive use. With a weight of **2.2 kg**, it remains firmly in place even in challenging outdoor environments.

This model meets European guidelines for **temporary traffic organization, construction-site safety and public-space marking**, making it suitable for a wide range of applications. Blue traffic cones are often used in accordance with local rules to **indicate technical work areas, specialized routes, parking zones or restricted access zones**.

### Intended Use Based on Legal Recommendations

The cone is recommended for:

- roadworks and maintenance projects
- lane separation and vehicle-flow control
- parking-area marking
- defining work zones for utilities and services
- training courses, sport events and maneuvering routes

### Five Additional Uses

1. Temporary marking of delivery zones

2. Dividing pedestrian pathways
3. Marking cleaning or maintenance areas in halls
4. Safety marking for forklift routes
5. Securing event entrances and VIP pathways

## Why Choose Our Product?

For many years our company has been a recognized **manufacturer and direct importer of road-safety equipment**, supplying wholesale and retail customers across numerous European markets. We offer one of the **largest assortments of road-safety products**, competitive pricing and **fast shipping directly from our warehouse**. Our brand is widely known and trusted, valued for reliability and professional quality.

Choosing this cone means selecting durability, visibility and outstanding value for money.
