Description

100 cm high road cone.

Made of flexible PE HD, base made of recycled rubber.

Color - orange, 2 white reflective stripes made of 2nd generation foil.

Weight - 7 kg.

The 100 cm high road cone consists of two parts - a base made of durable recycling rubber (REC) and a cone made of durable polyethylene (PE). The orange warning cone has two white stripes covered with a second generation reflective foil. The reflective cone is stable - its weight is 7 kg. Orange reflective cone is perfect for organizing parking spaces or marking driving lanes. Our traffic cones are often used in the automotive, renovation, construction, logistics, forwarding and event industries.

Traffic Cone 1000 mm - premium quality road safety device

The **1000 mm traffic cone** in **orange and white** is a professional **road safety device** designed for maximum visibility and durability. The cone is made of robust **polyethylene**, and the heavy-duty base from **recycled rubber** ensures stability and increased lifespan. Two **white reflective stripes** guarantee excellent visibility day and night.

Purpose and legal compliance

This cone complies with European road safety standards and is required for:

- roadworks,
- marking hazards,
- temporary traffic management,
- maintenance and installation work,
- securing restricted areas.

Its 1000 mm height meets regulations for professional use on public roads.

5 additional application ideas

1. Logistic centers
2. Parking lots

3. Sports facilities
4. Events and mass gatherings
5. Construction zones

Why choose our product?

- top-quality materials and craftsmanship,
- excellent value for money,
- fast delivery directly from our warehouse,
- many years of experience in road safety equipment,
- we are a manufacturer and direct importer,
- we supply multiple European markets,
- huge range of road safety devices.
