Description

Rubber Parking Stopper 1800x150x100 mm – reliable parking protection

The 1800 mm rubber parking stopper is a professional road safety product designed to protect parking spaces and surrounding infrastructure. Made from durable recycled rubber, it is resistant to vehicle impact, heavy loads and weather conditions.

Safety, visibility and compliance

The black parking stopper with yellow reflective elements ensures excellent visibility during both daytime and nighttime conditions. Parking stoppers are widely recommended under traffic safety regulations and workplace safety guidelines to prevent vehicles from crossing parking boundaries and damaging walls, pillars or curbs. With a weight of 15 kg and secure installation using 4 mounting anchors, the stopper provides long-term stability.

Versatile applications

Additional uses:

1. Parking lane separation
2. Pedestrian traffic protection
3. Bicycle lane marking
4. Loading and unloading zones
5. Temporary traffic organization

Why choose our company

We have specialized in road traffic safety equipment for many years. As a manufacturer and direct importer, we are trusted across European markets. We offer excellent value for money, fast delivery and direct shipment from our warehouse.
