Description

Versatile 50 cm PVC Traffic Cone - Essential for Road Safety

Our **professional traffic cone** with a height of **50 cm** and a weight of **1.2 kg** is a **reliable road safety device**. It is made from **flexible** and **durable PVC**, ensuring its **longevity** and resistance to weather conditions and mechanical damage. Thanks to its **optimal weight** and **robust construction**, it is stable yet easy to transport and store.

Purpose and Legal Regulations: This **orange warning cone** is a key element for temporary **road marking**, in accordance with regulations concerning **traffic organization** (e.g., relevant national road traffic safety acts or guidelines). It is used to delineate lanes, road works zones, parking areas, and hazard zones.

Additional Applications (Beyond the Standard):

1. **Mass Events and Festivals:** Quick delineation of access paths, VIP zones, or temporary parking areas.
2. **Driving Schools and Training:** Ideal for precise **maneuvering practice** and setting up obstacle courses.
3. **Warehouses and Logistics:** Marking hazardous areas for forklifts or temporary communication routes.
4. **Private Use:** Securing driveways, blocking guest parking spots, or defining a safe play zone for children.

Our company has been a **leader, manufacturer, and direct importer** of **road safety equipment** for many years. We are **known and valued in the European market** for **the highest quality** and **wide product range**. We sell **PVC traffic cones** and other **safety workwear/products** to **wholesale** and **retail** customers across many European markets. **We are proud** to have **probably the largest assortment of traffic cones in Europe**, allowing us to offer **competitive prices** and **fast shipping**. Trust in **experience** and choose **proven solutions** for **professional demarcation!**

A road cone, 50 cm high.

Made of flexible PVC.

Color - orange, 2 white stripes.

Weight 1.2 kg.

On special request, we provide the service of marking cones, e.g. logo, company name.

50 PVC traffic cone is one of the most popular traffic cones in the segment. Thanks to the surprisingly low price and high-quality workmanship, the warning bollard works in various situations. It is made of soft PVC, which makes it more resistant to damage caused by a vehicle collision. It is one of the main criteria in the construction, road and driving schools industries. The basic bollard has stripes painted with white paint, which, combined with the contrasting orange color, allows you to see the bollard from long distances. Like other road safety accessories, it is adapted to adverse weather conditions. For customers who want to ensure perfect visibility of the cone on the road, we offer a cone with a reflective microsphere. Thanks to the reflection, the rubber cones are also visible at night, which allows

you to stay safe around the clock. It also works well in places where access to light is limited (warehouse halls, tunnels, underground parking lots). U-23 cones can be used for securing short-term works on the road, marking out zones excluded from traffic or clearly signaling the edge of the road.
