Material	Recycling
Weight	4,2 kg
Shipping time	2-3 days

Description

Pachołek 3 side ZAKAZ POSTOJU B-35

Pachołek drogowy 3-stronny ze znakiem zakaz postoju B-36 służy do tymczasowych wygrodzeń stref wyłączonych z możliwości parkowania. Wykonany jest z elastycznego PVC, co sprawia że pachołek jest bardziej wytrzymały na uszkodzenia mechaniczne, takie jak np. najechanie przez pojazd. Pachołek ostrzegawczy, dzięki swojej kolorystyce, jest wyraźnie widoczny na drodze i jasno wskazuje na miejsce, w którym parkowanie jest zabronione. Może służyć jako dodatkowe akcesoria bezpieczeństwa ruchu drogowego, umieszczając go w strefach gdzie parkowanie jest zabronione lub jako samodzielny sygnał do zakazu parkowania (np. na terenie hoteli, zamkniętych parkingów, szpitali itd.). Gumowy pachołek jest uniwersalny w zastosowaniu, a jego mocniej dociążona podstawa sprawia, że jest bardziej odporny na przewrócenie. cena pachołka drogowego sprawia, że jest tanią alternatywą dla znaków drogowych.

Cechy:

- Trzystronny pachołek o wysokości 50 cm.
- Wykonany z PCV.
- Kolor żółty, z każdej ze stron znak - Zakazu postoju.
- Waga: 3,85 kg
- Wyskokość: 50 cm

Three-Sided Traffic Cone – Yellow, Recycled Rubber, 500 mm, 4.2 kg – No Parking Sign (B-35)

A Professional Traffic Cone for Maximum Safety and Visibility

Our **three-sided traffic cone** in **yellow**, made from **high-quality recycled rubber**, is designed to ensure the highest level of road safety. The clearly visible **No Parking (B-35) sign**, displayed on all three sides, provides unambiguous communication and ensures immediate driver response. With a height of **500 mm** and a stable weight of **4.2 kg**, the cone performs reliably in all weather and terrain conditions.

For many years, our company has **specialized in road traffic safety devices**. We are both a **manufacturer and direct importer**, offering an extensive range of road equipment for retail and wholesale customers. We operate across multiple European markets, and most of our products are shipped **directly from our warehouse**, ensuring **fast and professional delivery**.

Exceptional Quality and Eco-Friendly Material – Recycled Rubber

The cone is manufactured from **recycled rubber**, offering:

- excellent resistance to mechanical damage,
- high flexibility that allows it to withstand vehicle impact,
- UV resistance,
- stability even in strong winds,
- long service life and all-season durability.

It is an **eco-friendly**, durable, and economical solution, combining **premium quality with a very attractive price-to-value ratio**.

Product Purpose – Compliant with Legal Regulations

This traffic cone featuring the **B-35 No Parking sign** complies with legal guidelines for road traffic safety devices used for:

- temporary work zones on public roads,
- marking hazardous or restricted areas,
- temporary or emergency traffic organization,
- applications requiring compliance with standards for vertical road signage and safety devices.

This makes it an essential product for roadwork teams, municipal services, construction companies, and traffic management organizations.

Why Choose Our Traffic Cone?

- **High visibility** thanks to the bright yellow color and the B-35 No Parking sign.

- **Excellent stability** – the 4.2 kg weight keeps the cone securely in place.
- **Durability and flexibility** – recycled rubber minimizes the risk of damage.
- **Regulation-compliant signage** – ideal for professional traffic organization.
- **Fast shipping** – products dispatched directly from our warehouse.
- **Great price–quality ratio** – professional, long-lasting, and economical.
- **Strong market reputation** – we are a well-known and respected supplier of road safety equipment across Europe.

Additional Suggested Uses for the Traffic Cone

Beyond standard roadside applications, the three-sided cone can also be used for:

1. **Marking restricted or reserved parking zones**
   – ideal for company, residential, or commercial parking areas.
2. **Temporary marking of loading/unloading zones**
   – perfect for warehouses and logistics operations.
3. **Separating pedestrian zones or restricted areas during events**
   – highly visible, stable, and easy to deploy.
4. **Marking industrial areas, garages, or construction interiors**
   – resistant to vehicle contact and suitable for indoor use.
5. **Use in driving schools and road safety training**
   – a robust and reusable training element.

Choosing Us Means Choosing Quality and Reliability

We have been providing **high-quality road traffic safety equipment** for many years. As a manufacturer and direct importer, we guarantee **top-tier quality, competitive pricing, and excellent customer service**. Our products are supplied across many European markets and appreciated by both wholesale and retail clients.

If you are looking for a **durable, stable, and highly visible traffic cone with a B-35 No Parking sign**, made from long-lasting recycled rubber, this product is the perfect choice.

We ensure fast delivery and complete satisfaction with every order!
