Description

Concrete Safety Barrier Yellow-Black – The Highest Class of Protection and Warning

We present the **professional concrete safety barrier** type **U-14b** with dimensions of **2000x550x810 mm** and a weight of **1200 kg**, made from **durable B20/25 concrete**. What distinguishes this model is the **additional warning paintwork**: **diagonal yellow-black stripes** 50 cm wide, which ensure **maximum visibility** of the barrier in all conditions, both day and under artificial lighting.

Warning Function and Safety: The main task of this **painted barrier** is **accident prevention** by **effectively preventing vehicles from leaving the carriageway** and **immediately drawing attention** to the road edge or fixed obstacles (poles, buildings) – especially on **viaducts** and **embankments**. The barrier's design, compliant with guidelines, aims to **safely redirect the vehicle** in case of a collision, **minimizing damage**. The warning paint makes it an **indispensable infrastructure element** in **high-risk zones**.

Our Expertise and Quality: As a **manufacturer** and **direct importer** of **road safety equipment**, we offer only **proven solutions**. Our **U-14b safety barriers** with **durable yellow-black marking** guarantee **longevity** and **regulatory compliance**. We operate in many European markets, supplying products to **wholesale** and **retail** customers. We ensure **competitive prices** and **fast logistics** for this **massive and visible concrete barrier**. Trust the **leader** in **professional road security**!
