Description

OUTDOOR pull-out tape posts are made of powder coated red or yellow steel. They have a 3.6 m long separating tape, unwound from the head located on the post. Our barrier posts are characterized by their stability, also when the tape is pulled out. Cassettes with a pull-out tape and the barrier tape itself are available in many color variants, so that the customer can adjust the product to his own individual needs. The bases of the barrier posts are made of durable polyethylene (PE), thanks to which the posts are stable and durable. The bases are empty inside for easy transport and storage, and can be filled with sand or water to add weight and improve stability. The fence posts are intuitive and convenient to install, which allows you to quickly create temporary security. Posts with a separating tape will also prove useful in securing the workplace or carrying out renovation works.

Features:

base to be filled with water or sand, black,

3.65m tape

the perfect solution for all weather conditions.

When the base is empty, the post is light and easy to transport and store.
