Net Price: PLN 55.00

Technical Specification

Attribute	Value
Dimension	620x250x100
Color	Yellow
Material	PE
Weight	12 kg
Shipping time	3-7 days

Description

The U-25b point separator can easily and visibly separate traffic lanes, define lanes of public transport vehicles, mark road narrowing and zones excluded from traffic. Parking limiters are used to mark the edges of parking spaces in a visible manner and to prevent vehicles from driving beyond them. Parking separators minimize the chance of a collision or damage to the infrastructure and maintain an optimal level of security. Parking fenders will work well in parking lots, warehouse halls, under the store or they are also suitable for a private garage.

Point separator U-25b 620x250x100

It is designed for use on straight sections of roads with U-21 plates

Weight 12 kg.

U-25 motion separators are designed for optical and mechanical:

- separation of lanes with opposite traffic directions,
- separation of lanes for public transport vehicles,
- determining the vehicle path,
- designating narrow lanes,
- determining the edge of the road and (or) preventing undesirable (uncontrolled) driving on surfaces excluded from traffic, pedestrian and bicycle paths.

Dimension 620x250x100 We recommend our maintenance services up to 100 km from Warsaw
