Przeznaczony do prac drogowych, remontowych, odgradzania ruchu, wyznaczania toru jazdy, wygradzania miejsc parkingowych i inne.

Road Traffic Cone 340 mm - Flexible PVC, Orange Color, 1 Reflective Stripe

Professional Traffic Cone - Safety, Visibility, and Reliability in All Conditions

The **340 mm road traffic cone** made of high-quality **flexible PVC** is a reliable road safety device recommended for both professional and general-use applications. Its intense **orange color** combined with **one reflective stripe** ensures excellent visibility during the day and at night, making this model perfect for marking road works, designating safety zones, or organizing temporary traffic routes. Thanks to its **0.52 kg weight**, the cone provides stability while remaining easy to transport and store.

Why Choose Our 340 mm Traffic Cone?

- **Highest quality workmanship** – durable, flexible PVC resistant to mechanical damage and weather conditions.
- **Excellent visibility** – reflective stripe significantly increases safety at night and in low-visibility conditions.
- **Outstanding value for money** – professional-grade product at a highly competitive price.
- **Fast delivery** – most orders are shipped directly from our warehouse.
- **Experience and reputation** – our company has been manufacturing and importing road safety equipment for many years. We are a well-known and respected brand on the European market, serving both wholesale and retail customers.

Detailed Product Description

The cone is designed for intensive use. The flexible PVC material ensures resilience and impact resistance—when driven over by a vehicle, the cone quickly returns to its original shape. The **reflective foil stripe** improves visibility and meets the requirements for temporary traffic organization, ensuring compliance with road safety device regulations.

Technical specifications:

- **Material:** flexible PVC
- **Color:** orange
- **Reflective element:** 1 reflective stripe
- **Height:** 340 mm
- **Weight:** 0.52 kg
- **Use:** professional and general-purpose area marking

Compliance With Legal Regulations and Intended Use

According to regulations regarding **road traffic safety devices** (including rules for temporary traffic management), traffic cones are used for:

- marking hazardous or restricted areas,
- indicating road works and construction zones,
- organizing detours and temporary traffic changes,
- marking areas in parking lots, warehouses, logistics centers, and industrial halls.

The 340 mm traffic cone is perfectly suited for situations where fast, visible, and efficient area marking is required.

5 Additional Ways to Use the Traffic Cone

1. **Driving schools and training centers** – ideal for setting up practice courses and maneuvering areas.
 2. **Sports and recreational events** – marking running routes, cycling tracks, and sports training zones.
 3. **Workplace safety zones** – marking pedestrian paths and hazardous areas in industrial environments.
 4. **Private or company parking areas** – easy and mobile marking of reserved or temporary parking spaces.
 5. **Schools and kindergartens** – safe way to create obstacle courses, play zones, or road safety education areas.
