Description

Road Traffic Cone 500 mm - orange with two white stripes

Manufacturer of road safety equipment

The professional 500 mm traffic cone is a product designed for road safety, easy handling and reliable durability, even in demanding working conditions. This **orange traffic cone with two white stripes** is made of high-quality flexible PVC, ensuring long-term resistance to mechanical damage, dirt and weather conditions.

With a weight of approx. 1.1 kg, the cone provides ideal balance between stability and ease of transport, making it suitable for construction companies, road administrators as well as private users. Its **excellent price-to-quality ratio** makes it a perfect option for wholesale and retail purchases.

Technical specification of the 500 mm road cone

- height: **500 mm**
- colour: **orange**
- finish: **two white non-reflective stripes**
- material: **flexible PVC**
- weight: **approx. 1.1 kg**

Every detail has been created with durability in mind. Flexible PVC prevents cracking and ensures that the cone keeps its original shape even under pressure or when run over by a vehicle.

Product application - compliant with road safety regulations

Traffic cones can be used in both public and private spaces. This product is widely used in temporary traffic organisation according to regulations related to road safety and workplace protection.

Typical applications include:

- securing construction and road maintenance areas,
- marking temporary changes in traffic organisation,

- separating or reserving parking spaces,
- blocking access to specific zones,
- visual identification of hazard areas.

In accordance with regulations concerning temporary traffic organisation, proper marking reduces risk of accidents and increases safety for both pedestrians and drivers.

5 additional recommended uses

Our traffic cone is extremely versatile and suitable for many different environments:

1. **Sports facilities and training areas** – marking routes and activity zones.
2. **Private, corporate or communal parking areas** – reserving spaces or marking obstacles.
3. **Outdoor events and festivals** – ensuring safe pedestrian communication routes.
4. **Warehouse logistics and storage yards** – marking operational zones or transport corridors.
5. **Safety and evacuation training** – marking assembly points and evacuation routes.

Such wide applicability makes the **flexible PVC traffic cone** a universal and cost-effective choice.

Why choose our traffic cone?

Our company has been active in the road safety equipment industry for many years. We are both a **manufacturer and direct importer**, enabling us to provide excellent pricing, high availability of goods and fast shipping.

- ✓ we supply wholesale and retail customers
- ✓ we operate on multiple European markets
- ✓ we offer a wide range of road safety items
- ✓ we specialise in BRD (road safety equipment)
- ✓ most products are dispatched directly from our warehouse

Our brand is recognised and appreciated for reliability, expertise and outstanding product quality. We ensure fast order processing, including large orders for construction companies, municipalities and infrastructure projects.

If you need a durable product, made of strong PVC, compliant with its intended use, and available at an

attractive price with fast delivery – our **500 mm traffic cone** is the right choice.

Order now and benefit from professional solutions trusted by the road safety industry! With our products you will secure working areas, improve visibility and guarantee safety in public and private spaces.

50 cm PVC Traffic Cone with Warning Films - Guarantee of Visibility and Safety

Our **professional traffic cone** with a height of **50 cm** and an optimal weight of **1.1 kg** is a **reliable road safety device**. It is made from **flexible** and **durable PVC**, ensuring resistance to weather conditions and deformation. The key element enhancing **safety** is the **two white bands** made of **special warning (reflective) film**. This **high-intensity film** significantly increases the **cone's visibility**, especially after dark and in poor weather conditions.

Purpose and Legal Regulations: This **cone with reflective stripes** complies with requirements for temporary **road signage** and **construction site security**. The 1.1 kg weight provides adequate stability while ensuring easy handling. It is essential for delineating work zones, temporary obstacles, and guiding traffic in accordance with **applicable road traffic regulations**.

Additional Applications (Beyond the Standard):

1. **Health & Safety and Fire Training:** Marking evacuation routes and safety zones in industrial halls.
2. **Parking Areas with Limited Visibility:** Durable protection for corners and pillars.
3. **Equipment Rental Companies:** Marking loading and unloading zones for heavy machinery.
4. **Sports and Recreation:** Delineating routes and obstacle courses where **high visibility** is required.

As a **leader, manufacturer, and direct importer** of **road safety equipment**, our company is synonymous with **highest quality** and **innovation**. Our **traffic cones with warning film** are appreciated by **wholesale** and **retail** customers across many European markets. We are proud to have **probably the largest assortment of traffic cones in Europe**, which guarantees **competitive prices** and **immediate shipping**. Choose **professional solutions** with **excellent visibility**!
