Weight	8 kg
Shipping time	3-7 days

Description

The outer post with a pull-out tape is intended for use outside the building and is much more resistant to weather conditions. The barrier post is made of durable plastic, on the top it has a cassette with a warning tape, 3 m long. The base is made of environmentally friendly recycled rubber and has an additional handle for easy transport. The product is available in many color variants, both for the post itself and the barrier tape. A post with a barrier tape has a self-locking mechanism for winding the tape, its use is much safer and more convenient. The product allows you to create fencing of dangerous places in a quick, convenient and visible way.

Features:

The post is made of high quality plastic.

Intended for use in external and internal conditions.
