Gross Price: PLN 49.20

Net Price: PLN 40.00

Technical Specification

Attribute	Value
Dimension	790 x 390 x 105 mm
Color	Black
Material	Recycling
Weight	28 kg
Shipping time	3-7 days

Description

Recycling bases for road signs, directing and fencing boards are a stable and damage-resistant element that ensures the stability of road bollards installed in it, and maintains road safety devices.

Despite their high weight (approx. 30 kg), their design facilitates manual transport through profiled handles (handles).

Technological (assembly) holes enable the installation of various posts used in road construction.

All this means that the base as an element of vertical marking ensures easy, quick and safe organization of road safety.

They are used:

- as stabilizers for supporting structures,
- for fast separation of road works,
- to cordon off hazardous locations, etc.

Holes: 2x fi 42 Diam. 50, Wed 40, Wed 60
