Attribute	Value
Dimension	400 L - 1260x950x792 mm
Color	Green
Material	PE
Weight	25 kg
Shipping time	2-3 days
Production time of 100 pcs	8 days

Description

400 L Green Sand and Salt Container - High-Capacity Polyethylene Grit Bin

Discreet 400 L green grit bin - large storage volume for landscaped and residential areas

The **400 L green sand and salt container** is designed for sites that require a generous supply of de-icing material but prefer a more discreet, natural look. The green colour blends seamlessly into residential developments, parks, campuses, landscaped business parks and recreational areas, making the grit bin visually unobtrusive while still easily accessible for winter maintenance teams.

The bin is manufactured from **flexible, high-quality polyethylene**, offering excellent resistance to impact, frost, moisture and UV radiation. **Rounded edges** improve handling safety and help protect surrounding surfaces from damage. The robust, **weather-resistant lid** closes securely and protects the stored sand, road salt or de-icing mixtures from rain, snow and dirt, keeping the material dry and ready for use throughout the winter season.

Technical features - 400 L green sand and salt container

- Capacity: **400 litres**
- Application: **storage of sand, road salt and de-icing mixtures**
- Material: **high-grade polyethylene**
- Colour: **green - discreet, nature-friendly appearance**
- Edges: **rounded for safe handling**
- Lid: **secure closing lid, protecting contents from moisture and dirt**
- Weather resistance: **suitable for intensive, long-term outdoor use**

Benefits - why choose a 400 L green grit bin?

With its 400 L capacity, the green sand and salt container provides ample storage for larger areas, reducing the need for frequent refilling and supporting efficient winter maintenance planning. It helps property owners and facility managers comply with **winter safety and duty-of-care regulations** by keeping anti-slip materials close to paths, access roads and entrances. The durable polyethylene body does not rust and requires only minimal maintenance over its service life.

The grit bin is supplied with a **warranty**, and the combination of robust construction, high storage volume and discreet design offers an excellent **price-to-quality ratio**. It is an ideal solution for residential complexes, public spaces and business parks where safety and aesthetics are equally important.

Typical applications and usage scenarios

The 400 L green sand and salt container is particularly suitable for:

- residential estates, housing developments and shared outdoor areas,
- parks, green spaces and recreational zones,
- school grounds, university campuses and sports facilities,
- office parks and corporate campuses,
- municipal services and public institutions responsible for winter maintenance.

Strategically placing grit bins around entrances, paths and internal roads helps reduce slip-and-fall incidents and improves overall winter safety.

Five additional uses for the 400 L green container

1. Storage of industrial absorbents, spill kits and workplace safety equipment.
2. Container for aggregates, gravel and loose construction materials on large building sites.
3. High-capacity feed or grain bin in agricultural and equestrian facilities.
4. Multi-purpose storage box for tools, spare parts and maintenance supplies in workshops and warehouses.
5. Container for cleaning products, maintenance chemicals and winter equipment in public buildings.

Road safety equipment from an experienced supplier

Our company has long-standing experience in **road safety equipment**. As a **manufacturer and direct importer**, we supply sand and salt containers, traffic products and other safety solutions to customers across many European markets. We work with both wholesale and retail clients, and **most items are dispatched directly from our warehouse**, ensuring fast delivery and reliable availability. With a broad range of road-safety products and a strong focus on quality, the 400 L green sand and salt container is a key component in a professional winter safety system.
