Dimension	250 L - 1100x820x660 mm
Color	Blue
Material	PE
Weight	17 kg
Shipping time	2-3 days
Production time of 100 pcs	8 days

Description

250 L Sand and Salt Container - Blue Polyethylene Grit Bin for Large Areas

Blue 250 L grit bin - designed for heavy-duty winter maintenance

The **250 L blue sand and salt container** is a high-capacity grit bin developed for locations that require large amounts of de-icing material. It is ideal for extensive car parks, industrial estates, logistics hubs, shopping centres and public facilities with heavy foot and vehicle traffic. The blue colour makes the container easy to spot on site, helping staff and contractors to locate grit quickly during winter operations.

The body is made from **flexible, durable polyethylene**, which is resistant to impact, frost, moisture and UV radiation, making the container suitable for long-term outdoor use. **Rounded edges** improve handling safety and reduce the risk of damage to surrounding surfaces. The robust, **lockable lid** protects the stored sand, rock salt or de-icing mixtures from rain, snow and dirt, keeping the material dry and ready for immediate use.

Technical features - 250 L blue sand and salt container

- Capacity: **250 litres**
- Application: **storage of sand, road salt and de-icing mixtures**
- Material: **high-strength polyethylene**
- Colour: **blue**
- Edges: **rounded for safe handling**
- Lid: **secure closing lid, protecting contents from moisture**
- Weather resistance: **suitable for year-round outdoor use**

Benefits - why choose a 250 L blue grit bin?

With its 250 L capacity, this sand and salt container reduces the need for frequent refilling and ensures that a sufficient supply of de-icing material is always available on site. It supports compliance with winter maintenance and safety regulations by helping property owners and facility managers keep walking and driving surfaces safe. The high-quality polyethylene construction does not rust and requires minimal maintenance. The product is supplied with a **warranty** and offers an excellent **price-to-quality ratio**, making it a smart, long-term investment for organisations of all sizes.

Intended use, regulations and typical applications

The 250 L blue sand and salt container is suitable for:

- large car parks and access roads,
- industrial sites and logistics centres,
- residential complexes and shared outdoor areas,
- office buildings, retail parks and commercial sites,
- schools, hospitals and public institutions.

By placing grit bins near entrances, pedestrian routes and vehicle access points, you help reduce slip-and-fall incidents and improve winter safety for users of the site.

Five additional ways to use the 250 L container

1. Storage of industrial absorbents, spill kits and safety equipment.
2. Container for aggregates, gravel and small building materials on construction sites.
3. Feed or grain storage bin in agricultural facilities.
4. Multi-purpose storage box for tools, spare parts and consumables in warehouses.
5. Container for cleaning chemicals, maintenance supplies and winter equipment in public buildings.

Road safety equipment from an experienced supplier

Our company has many years of experience in **road safety equipment**. We operate as both a **manufacturer and direct importer**, supplying grit bins, traffic products and other safety devices to numerous European markets. We serve wholesale and retail customers, and **most orders are dispatched directly from our warehouse**, ensuring fast delivery and reliable availability. With our wide range of road products and strong focus on quality, choosing the 250 L blue sand and salt container means working with a trusted specialist in traffic safety solutions.
