Technical Specification

Attribute	Value
Dimension	5000 x 400 x 50 mm
Color	Yellow/black
Material	Recycling
Weight	79 kg
Shipping time	2-5 days

Description

Slowly 5 - 5 m modular road speed bump 50 mm, yellow/black, complete set with fixings

5 m Slowly 5 road speed bump - long traffic calming section for intensive traffic areas

The **Slowly 5 5 m road speed bump** is a robust **modular traffic calming system** designed for locations where a longer speed reduction section is required. This complete set consists of **2 end elements and 9 middle elements**, forming a total length of **5.0 metres**. The modules are arranged in an alternating **yellow/black colour pattern**, which guarantees very good visibility and clearly warns approaching drivers of the vertical traffic calming device.

All components of the Slowly 5 system are manufactured from **flexible and durable recycled material**, resistant to intensive traffic, temperature variations and outdoor exposure. The uniform system height of **50 mm** forces drivers to reduce speed, while still allowing a smooth passage at an appropriate speed. The 5 m version is particularly suitable for **main access roads, busy internal routes, large car parks, industrial estates and logistics centres**.

Technical specification - Slowly 5 5 m speed bump set

- Total length of the speed bump: **5.0 m**
- Height: **50 mm**
- Set composition: **2 end elements + 9 middle elements**
- End elements: **250 × 400 × 50 mm**, approx. **2 kg** each
- Middle elements: **500 × 400 × 50 mm**, approx. **8 kg** each
- Colour pattern: **yellow/black alternating** (starting with yellow)
- Material: **flexible, impact-resistant recycled material**
- Fixing points: **2 bolts per end element, 4 bolts per middle element**
- Recommended anchors: **12 × 120 mm screws with plugs and large washers**

Complete kit - screws and plugs included

The 5 m Slowly 5 speed bump is delivered as a **ready-to-install kit**. **The set price includes all necessary fixing screws and plugs**, matched to the total number of elements. There is no need to order any additional mounting hardware – everything required to anchor the speed bump permanently to the ground is supplied in the package.

As standard, we prepare the bump starting with a **yellow end element** and then arrange the modules in an alternating sequence **black/yellow/black/yellow/...**, ending again with a yellow element. If a different colour order is required (for example, to match an existing installation), this can be specified in the order comments.

Legal aspects - use of road humps on public roads

The Slowly 5 5 m set is a professional **road safety device**. When installed on **public roads**, national traffic regulations and applicable technical standards must be observed. In particular, **the use of vertical traffic calming devices on public roads requires appropriate warning traffic signs placed at the correct distance in advance of the bump**. The road authority or investor is responsible for proper signage and for compliance with local legal requirements and approved traffic management design.

Application and typical usage scenarios

The 5 m Slowly 5 modular road speed bump is a very versatile solution for:

- entrances and internal roads of large car parks at shopping centres and office complexes,
- main internal access roads in industrial plants and logistics parks,
- roads in distribution centres and loading yard approaches,
- company access routes, gate areas and barrier-controlled entries,
- service stations, car wash approaches and private access roads.

Five additional ways to use the 5 m Slowly 5 set

1. Creating extended low-speed zones at the entrance to sensitive areas with heavy pedestrian traffic.
2. Calming traffic on long internal stretches where repeated braking is required.
3. Combining the 5 m set with shorter sets (2 m and 3 m) to align with multi-lane or curved roads.
4. Using multiple 5 m sets to build continuous traffic calming lines along an entire internal route.
5. Upgrading existing installations by replacing worn bumps with a durable modular system.

High quality, warranty and experienced supplier

The Slowly 5 5 m road speed bump set is covered by a **warranty**. The use of **high-quality recycled material** ensures long service life, high resistance to mechanical loads and minimal maintenance requirements. The product offers an excellent **price-to-quality ratio**, making it attractive both for municipal applications and private investors.

Our company has many years of experience in the field of **road safety equipment**. We are a **manufacturer and direct importer** of speed bumps, road humps and a wide range of road products. We supply wholesale and retail customers on numerous European markets. **Most items are shipped directly from our warehouse**, ensuring **fast delivery** and high availability. The modular Slowly 5 system in the 5 m version is one of our flagship solutions for effective, reliable traffic calming.
