Dimension	500 mm
Color	Red
Material	Polyethylene (PE)
Weight	6 kg
Shipping time	1-2 days
Production time of 100 pcs	8 days

Description

Road barrier U-14 / U-25

Color - white / red

Dimensions - 110 x 40 x 50 cm

Weight - 6 kg

Plastic road barriers are one of the basic road safety devices. Thanks to the characteristic white and red colors, they are visible even from long distances. They clearly delimit the edge of the road and allow for the designation of zones temporarily excluded from traffic. Protective barriers are made of high-quality polyethylene, which makes the barriers resistant to unfavorable weather conditions. Plastic barriers have the dimensions of 40 cm x 110 cm x 50 cm. Safety road barriers allow them to be connected into long strips of fencing, which helps in setting up protections on longer sections. Road barriers are a common product purchased in the automotive industry when organizing various types of events, our company also deals with the rental of road barriers. Plastic U-14 barriers are also suitable for temporary works carried out on the road, in parking lots, in tunnels or on construction sites. Road separators are convenient to transport, they are easy to assemble and set up. Plastic road barriers can be filled with sand or water to weight them down, which makes the barriers more stable and more resistant to displacement.
