

Container for salt or sand 400 L yellow

DROGOWE
SP. Z O.O.

SKU: MM400Y

Gross Price: PLN 1,045.50

Net Price: PLN 850.00

Technical Specification

Attribute	Value
Dimension	400 L - 1260x950x792 mm
Color	Yellow
Material	PE
Weight	25 kg
Shipping time	2-3 days
Production time of 100 pcs	8 days

Description

400 L Yellow Sand and Salt Container - High-Capacity Polyethylene Grit Bin

High-visibility 400 L yellow grit bin - built for large, busy sites

The **400 L yellow sand and salt container** is a high-capacity grit bin specifically developed for large sites where winter maintenance is a constant challenge. It is the ideal choice for multi-storey car parks, industrial complexes, distribution centres, stadiums and public facilities with heavy traffic. The bright yellow body makes the bin highly visible, so staff can instantly locate the de-icing material when icy conditions occur.

Manufactured from **flexible, heavy-duty polyethylene**, the container offers excellent resistance to impact, frost, moisture and UV radiation. **Rounded edges** provide safer handling and help protect vehicles, walls and equipment from accidental damage. The strong, **weatherproof lid** closes securely, shielding sand, rock salt or de-icing mixtures from rain, snow and contamination, so the grit remains in optimal condition throughout the winter season.

Key technical features of the 400 L yellow grit bin

- Capacity: **400 litres**
- Use: **storage of sand, road salt and de-icing mixtures**
- Material: **high-quality polyethylene**
- Colour: **yellow for maximum visibility**
- Edges: **rounded for increased safety**
- Lid: **secure closing lid, resistant to weather and dirt**
- Application: **intensive, long-term outdoor use**

Benefits - why the 400 L yellow sand and salt container is a smart choice

The extra-large 400 L volume significantly reduces the need for frequent refilling, which is crucial on very large sites with multiple access routes and pedestrian areas. By keeping a generous supply of de-icing material close to where it is needed, the grit bin helps site operators comply with **winter safety and duty-of-care regulations**. It supports safer conditions for pedestrians and vehicles by enabling fast reaction to snow and ice.

The container is supplied with a **warranty**, and the robust polyethylene construction ensures a long service life with minimal maintenance. Combining durability, capacity and visibility, the 400 L yellow sand and salt container offers an excellent **price-to-quality ratio** for local authorities, facility managers and industrial operators.

Typical locations and usage scenarios

This large yellow grit bin is particularly suitable for:

- car parks and access roads at shopping centres, stadiums and office complexes,
- industrial estates, refineries and large production sites,
- logistics parks, distribution hubs and warehouse yards,
- residential developments with extensive internal roads,
- public institutions and high-traffic outdoor areas.

Strategically placed grit bins help reduce slip-and-fall incidents and support efficient winter maintenance planning.

Five additional uses for the 400 L yellow container

1. Storage of industrial absorbents, spill kits and safety gear.
2. Bulk container for aggregates, gravel and loose construction materials.
3. High-capacity feed or grain bin on farms and equestrian facilities.
4. Workshop storage for tools, spare parts and maintenance equipment.
5. Container for cleaning chemicals, maintenance supplies and winter equipment in public buildings.

Supplied by a specialist in road safety equipment

Our company has many years of experience in **road safety equipment**. As both a **manufacturer and direct importer**, we supply sand and salt containers, traffic products and other safety solutions to customers across numerous European markets. We work with wholesale and retail clients, and **most products are dispatched directly from our warehouse**, ensuring fast delivery and reliable stock availability. With a wide range of road-safety products and a strong focus on quality, the 400 L yellow sand and salt container is a key component in a professional winter safety system.
