Color	Yellow/black
Material	Recycling
Weight	86 kg
Shipping time	2-5 days

Description

Slowly 5 - 5.5 m modular road hump 50 mm, yellow/black, complete set with pallet shipping

5.5 m Slowly 5 road hump - extra-long modular traffic calming system

The **Slowly 5 5.5 m road hump** is a heavy-duty **modular traffic calming system** designed for locations where an extra-long speed reduction section is required. The complete set consists of **2 end elements and 10 middle elements**, which together provide a total length of **5.5 metres**. The modules are arranged in an alternating **yellow/black colour pattern**, ensuring very high visibility and clearly warning drivers of the vertical traffic calming device ahead.

All components of the Slowly 5 system are made from **flexible and durable recycled material**, resistant to intensive vehicle traffic, temperature variations and outdoor exposure. The system height of **50 mm** forces drivers to slow down, while allowing a smooth crossing at an appropriate speed. The 5.5 m version is particularly suitable for **wide access roads, main internal routes in industrial and logistics areas, large car parks and distribution centres**.

Technical specification - Slowly 5 5.5 m road hump set

- Total length of the road hump: **5.5 m**
- Height: **50 mm**
- Set composition: **2 end elements + 10 middle elements**
- End elements: **250 × 400 × 50 mm**, approx. **2 kg** each
- Middle elements: **500 × 400 × 50 mm**, approx. **8 kg** each
- Colour pattern: **yellow/black alternating** (starting with yellow)
- Material: **flexible, impact-resistant recycled material**
- Fixing points: **2 bolts per end element, 4 bolts per middle element**
- Recommended anchors: **12 × 120 mm screws with plugs and large washers**

Complete mounting kit and pallet shipping - up to 4 sets per pallet

The Slowly 5 5.5 m road hump is supplied as a **ready-to-install kit**. **The set price includes all necessary fixing screws and plugs**, matched to the total number of modules in the hump. There is no need to order additional mounting accessories – everything required to anchor the hump permanently to the ground is included in the delivery.

Due to the overall dimensions and weight, the 5.5 m road hump set is **shipped on a pallet**. For efficient transport and optimised logistics, we can load up to **4 complete 5.5 m sets on a single pallet**, which is particularly convenient for large projects, multi-site installations and wholesale orders.

As standard, the set is assembled starting with a **yellow end element** and the remaining elements are arranged in an alternating sequence **black/yellow/black/yellow/...**, ending again with yellow. If a

different colour sequence is required to match an existing installation or site design, we can prepare a custom configuration on request.

Legal aspects - use of road humps on public roads

The Slowly 5 5.5 m kit is a professional **road safety device**. When installed on **public roads**, applicable national traffic regulations and technical standards must be observed. In particular, **the use of vertical traffic calming devices on public roads requires appropriate warning traffic signs placed at the correct distance in advance of the hump**. The road authority or investor is responsible for correct signage and full compliance with local regulations and approved traffic management design.

Application and typical usage scenarios

The 5.5 m road hump Slowly 5 is an excellent solution for:

- wide access roads to logistics and industrial facilities,
- main internal routes in distribution centres and warehouse complexes,
- large car parks at shopping centres and office parks,
- company access roads, gate areas and barrier-controlled entries,
- service stations, car wash approaches and private access roads.

Five additional ways to use the 5.5 m Slowly 5 set

1. Creating long low-speed corridors in front of loading docks and ramps.
2. Calming traffic on main internal roads connecting several buildings or halls.
3. Reducing speed in mixed-use areas with pedestrian, forklift and truck traffic.
4. Combining 5.5 m sets with shorter Slowly 5 kits to follow complex road geometry.
5. Replacing older, non-modular humps with a robust system where individual elements can be easily exchanged.

High quality, warranty and reliable supplier

The Slowly 5 5.5 m road hump set is covered by a **warranty**. The use of **high-quality recycled material** guarantees long service life, high resistance to mechanical loads and low maintenance requirements. The product offers an excellent **price-to-quality ratio**, making it particularly attractive for professional use in industrial and logistics environments.

Our company has many years of experience in **road safety equipment**. We act as a **manufacturer and direct importer** of road humps, speed bumps and an extensive range of road safety products. We supply wholesale and retail customers across numerous European markets. **Most products are shipped directly from our warehouse**, ensuring **fast delivery** and high availability. The Slowly 5 modular system in the 5.5 m version is one of our key solutions for effective and reliable traffic calming.
