Description

BetonBlok 80×80×40 cm - Compact Modular Concrete Block for Versatile Construction Applications

The BetonBlok 80×80×40 cm is a compact yet highly durable modular concrete block made from premium C30/C37 structural concrete. It is designed for projects that require solid, reliable partitioning, secure structural elements and fast assembly without the need for mortar or foundations. Despite its moderate dimensions, this BetonBlok provides impressive stability and is widely used in industrial, commercial, construction and agricultural settings.

Technical Specifications

- Model: BetonBlok 80×80×40 cm
- Material: High-strength C30/C37 concrete
- Dimensions: 80 cm height, 80 cm width, 40 cm thickness
- Construction: Interlocking studs ensure perfect modular alignment
- Weather Resistance: Built for long-term outdoor performance
- Fire Resistance: **BetonBlok elements with widths of 60 and 80 cm meet fire-resistance criteria according to EN 13501-2.**

Key Benefits of BetonBlok 80×80×40 cm

This BetonBlok model combines excellent stability with easy handling, making it ideal for medium-scale structures where precision, flexibility and durability matter. The block is modular, reusable and can be repositioned at any time, allowing for dynamic construction planning. It is covered by a manufacturer warranty, confirming its outstanding quality and reliability. The materials used meet the highest European standards for durability and load capacity.

The moderate weight and compact size allow quick installation in areas with limited space, while maintaining the high structural reliability typical of all BetonBlok systems.

Primary Use Cases

- dividing walls in industrial halls
- storage bays for lighter bulk materials
- protective barriers on commercial sites
- organizational partitions on construction sites
- temporary or permanent fencing systems

Five Additional Application Ideas

- foundations for light modular equipment
- supporting blocks for machinery platforms
- traffic-control segment barriers
- stabilizing bases for temporary shelters
- protective borders around work zones

Why Choose BetonBlok?

Our company has supplied BetonBlok systems across Europe for many years, working with both wholesale and retail clients. We cooperate only with manufacturers who meet the highest quality requirements and are recognized for exceptional reliability. We are known for offering fast delivery — in fact, probably the fastest order processing time on the market.

Customers praise BetonBlok for its durability, practicality and excellent value for money. Those who chose the 80×80×40 cm version highlight its versatility, compact size and long-term stability, making it an ideal choice for a wide range of professional applications.
